

"I believe facility management is at a crossroads. With the International Facility Management Association's efforts along with its global partners, we can move the profession to the critically needed and valued position within organizations that it deserves. Future facility managers will provide sustainable, responsible, productive and efficient processes that allow workers to maximize their contributions."

- *Kathy O. Roper, CFM, MCR, LEED AP, IFMA Fellow
Associate Professor of Building Construction*

Now Online! Graduate Studies in Facility Management

Access a wealth of technological and industry knowledge while building a network comprised of Georgia Tech faculty and industry professionals. You get practical, directly applicable knowledge and credibility without leaving your home or office.

The new online program features a dedicated team guiding graduate students from application to graduation, as well as the highest standards of technical support.

The graduate track in Integrated Facility and Property Management is a professional, multi-disciplinary program that merges real estate development, construction, and operational management with business, communication and financial studies. The program emphasizes holistic and strategic thinking about the built environment and educates students on how to successfully integrate all elements of a facility to provide productive environments for users and make properties profitable investments for their owners.

Application deadlines for fall semester:

- March 15 / Int'l applicants
- June 1 / U.S. applicants

Application deadlines for spring semester:

- Sept. 1 / Int'l applicants
- Nov. 1 / U.S. applicants

Now Online! Graduate Studies in Facility Management

The graduate track in Integrated Facility and Property Management is designed for professionals interested in developing their expertise in these areas and equipping themselves for senior-level positions.

The program provides graduates with a clear understanding of the management skills and expertise necessary to be successful within the facility management industry. Topics explored include: sustainability, real estate, financial analysis, safety and environmental issues, maintenance management, professional trends, project planning, management and benchmarking. In addition, the master's program has worked closely with facility management professionals and related associations to ensure that the curriculum offered is consistent with the needs of professionals in the industry.

The program has received accreditation from the International Facility Management Association (IFMA) Foundation and is endorsed by the Building Owners and Managers Association (BOMA), and the Royal Institute of Chartered Surveyors (RICS). Currently, Georgia Tech is one of only three universities in the country to offer a graduate degree focused on facility management.

Career Opportunities

Facility and property management professionals must possess a wealth of skills and diverse business knowledge to plan for, obtain, maintain, and operate cost-effective and sustainable facilities. Facility managers work in a wide array of areas:

- real estate
- asset management
- project management
- facility operations and maintenance
- design-build
- energy management
- workplace design
- technology integration
- building renovation

Graduates of the program go on to senior-level and executive positions in a range of private and public organizations:

- facility and property management firms
- high-tech companies
- government
- military
- educational institutions
- real estate management companies

Candidates for the Master's program may have undergraduate degrees in a number of disciplines, including construction, architecture, engineering, city planning, management, business, real estate, and other related areas.

Applicants are required to comply with all Institute admission requirements, including taking the GRE or GMAT. In addition, international students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL).
