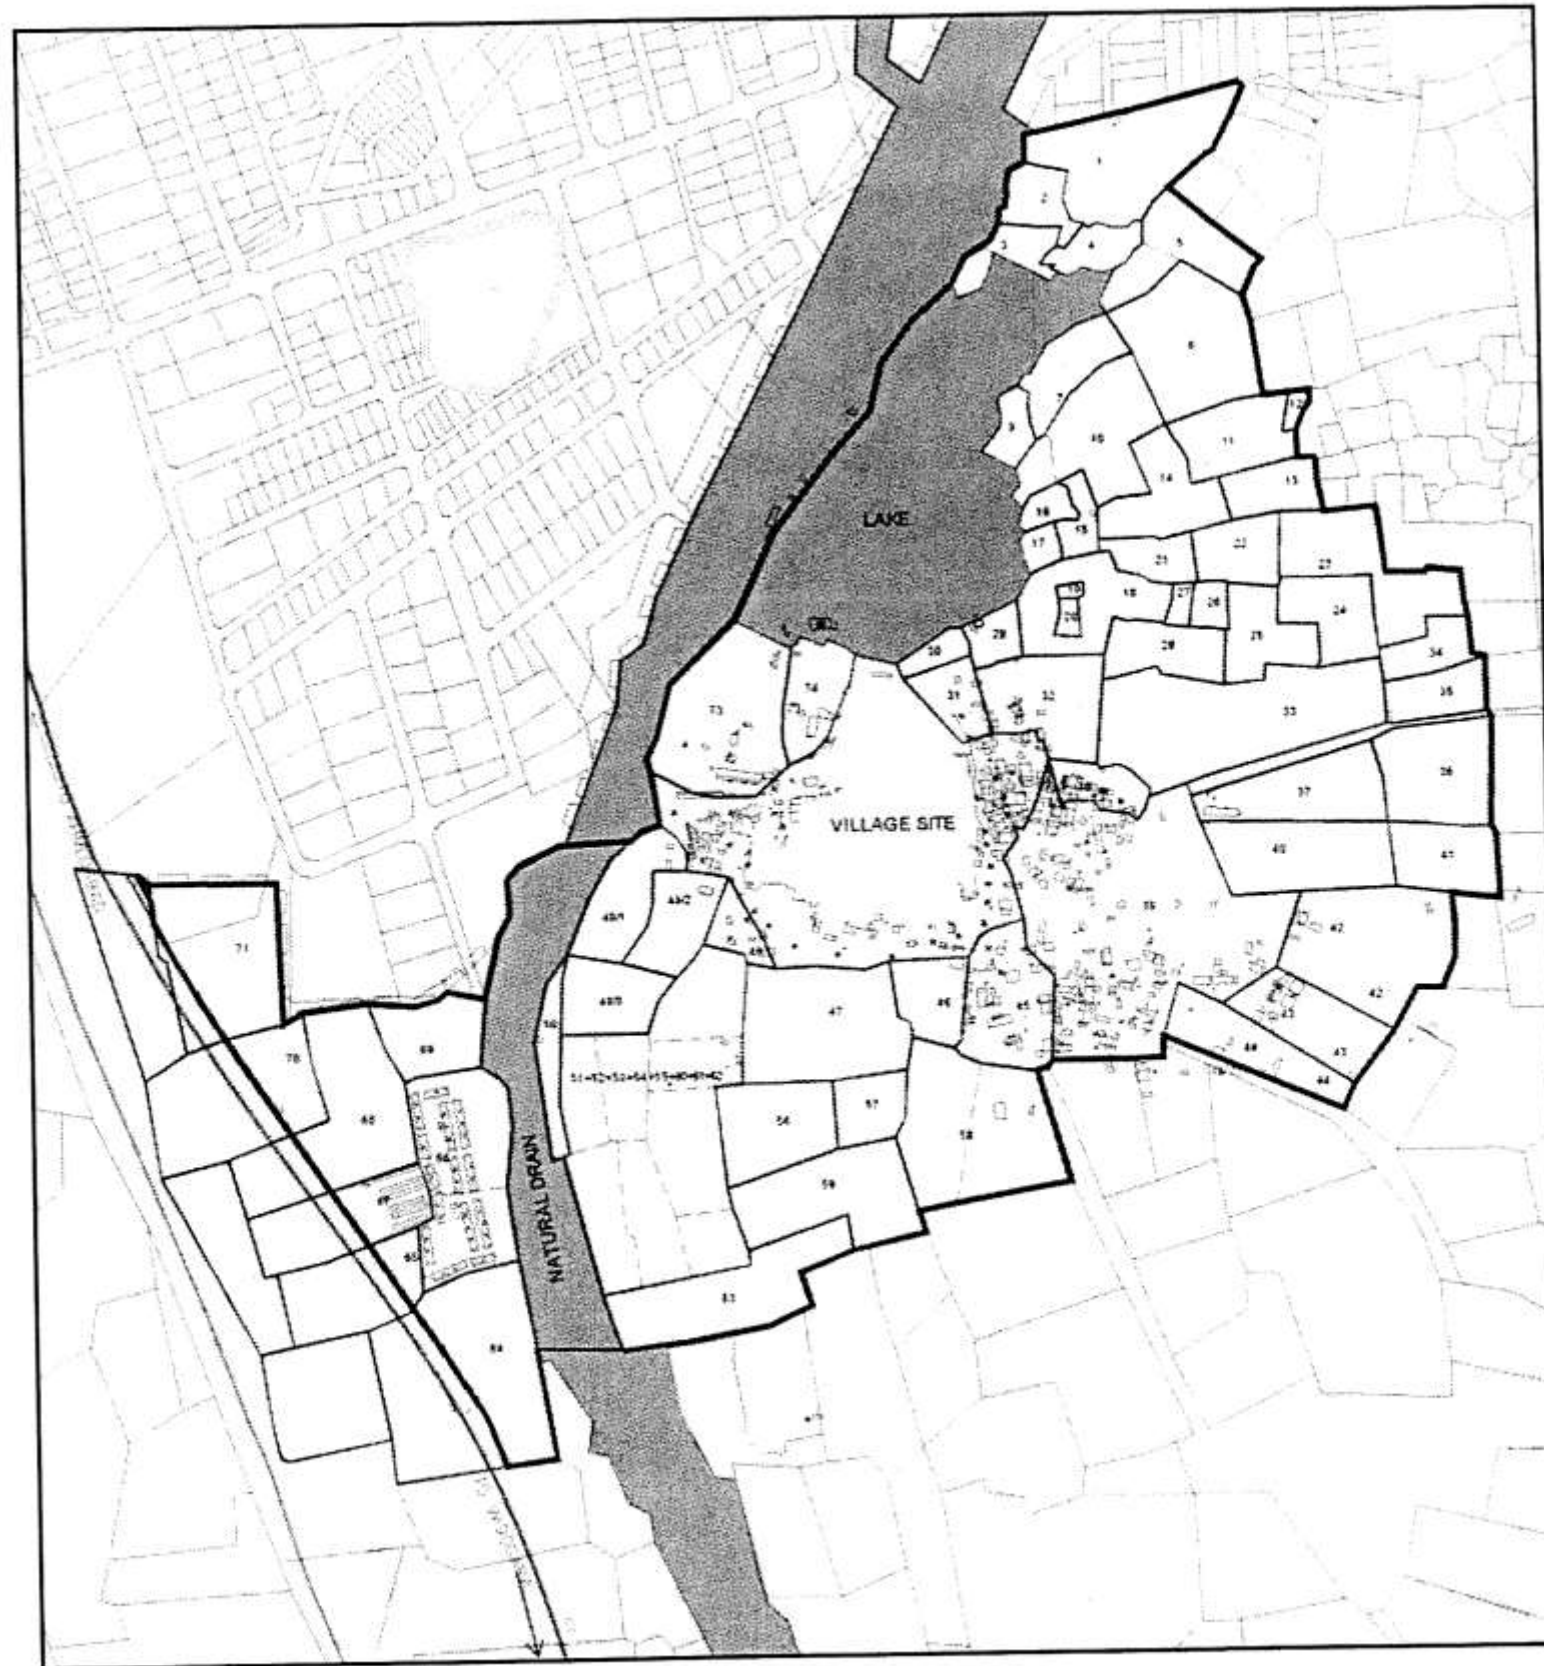

Figure 14. Marking original plots on the Survey

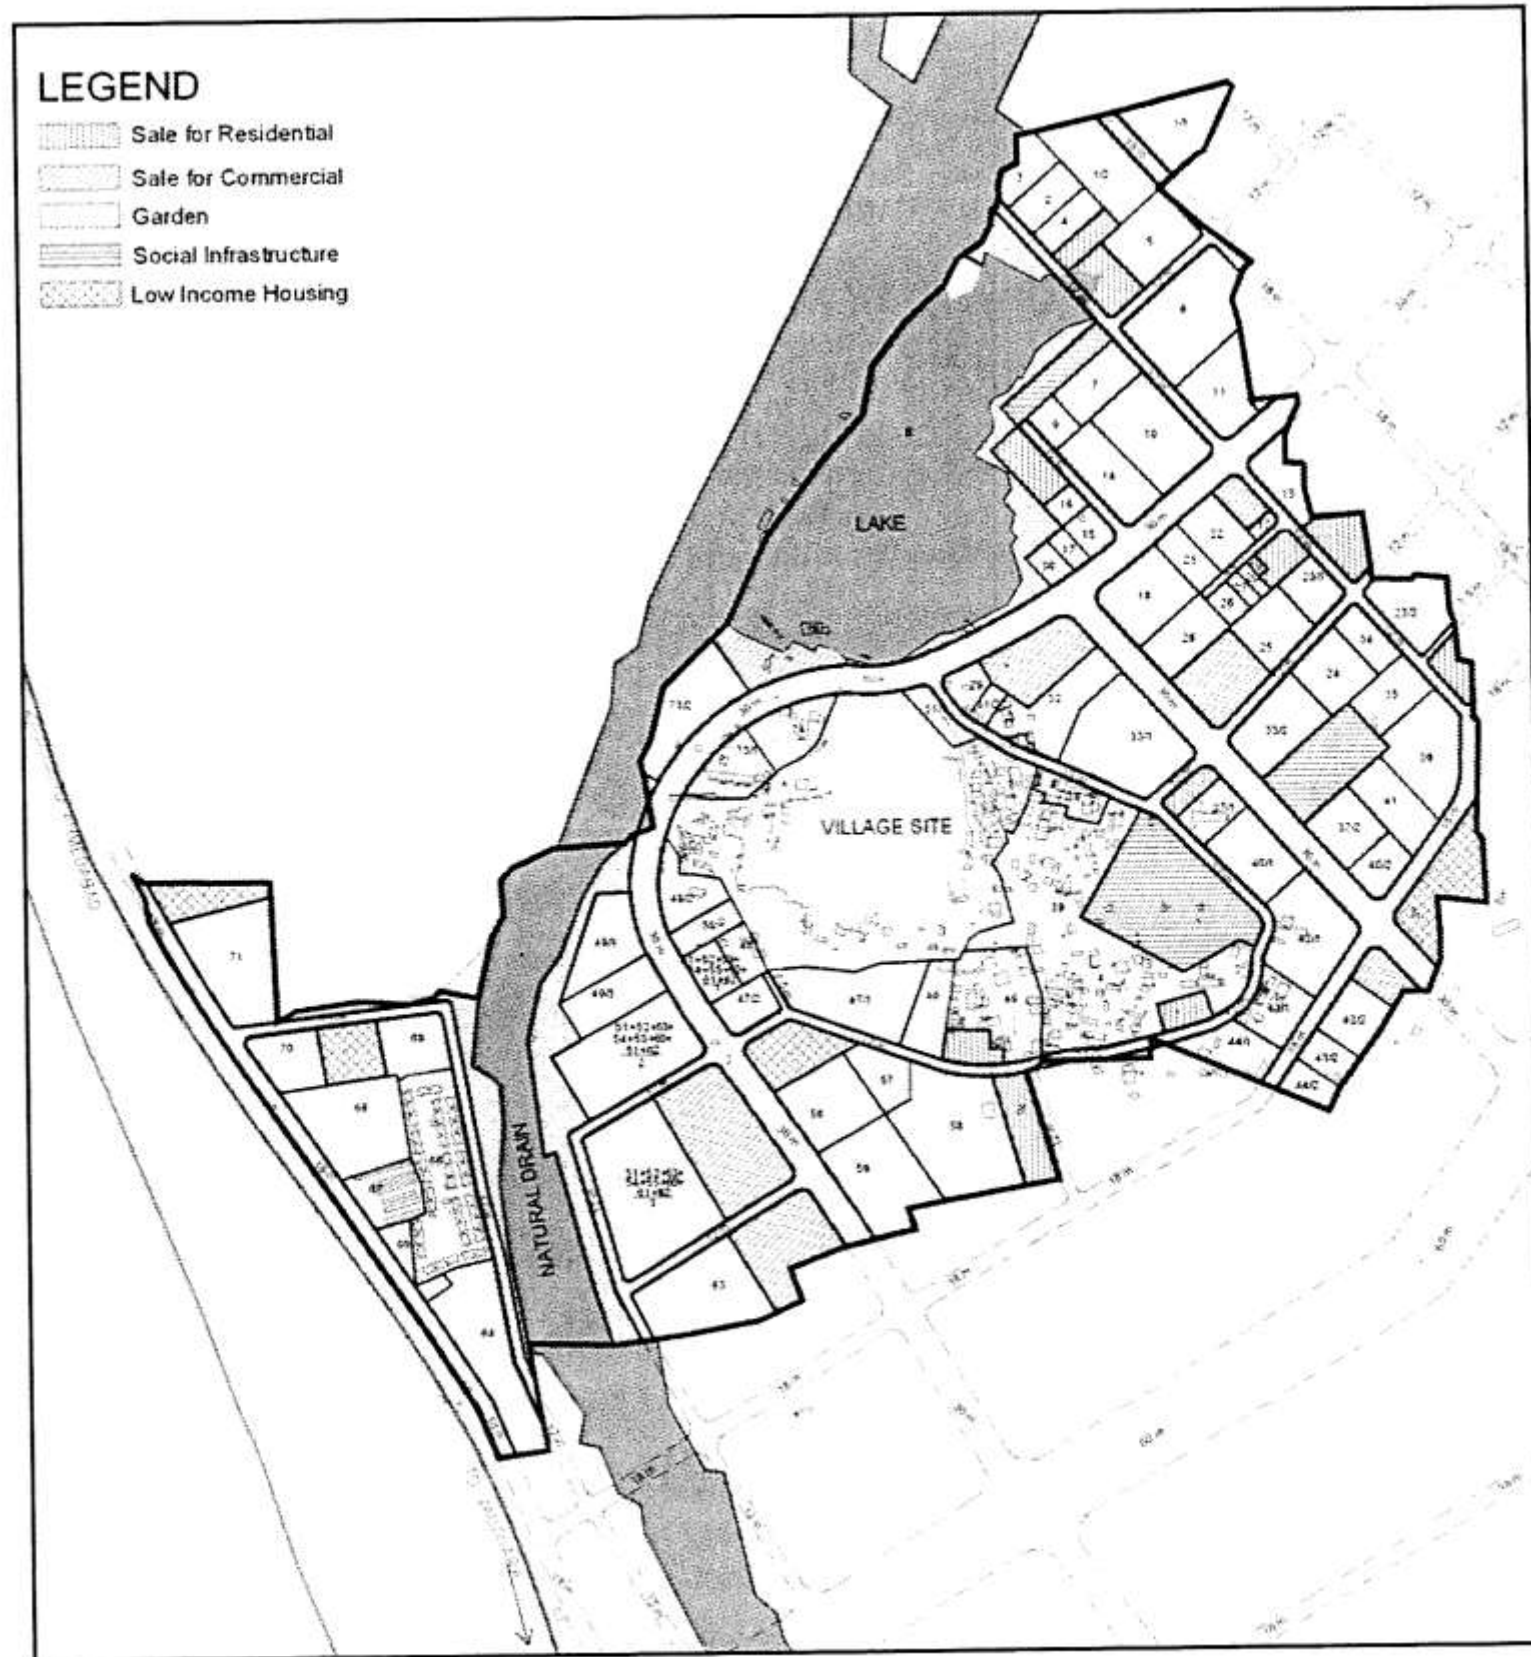

Figure 19. Delineation of final plots in the Town Planning Scheme

Planning in India Overview

The background of the slide features a repeating pattern of large, overlapping circles. Each circle is filled with a dense, intricate line art pattern in a light red or pink color. The pattern within the circles appears to be a complex, organic, or perhaps circuit-like design, with many small loops and lines. The circles are arranged in a staggered grid, creating a textured, layered effect across the entire slide.

“To effectively manage the new growth implies that... Irregular land holdings and plots will have to be given regular shapes; they must be ordered;... infrastructure services must be provided.”

-Shirley Ballaney, World Bank Report 2008
