

April 13, 2026 (Monday) 02:30-03:30 PM ET
Theme: Microphysiological Systems

Meeting link: <https://gatech.zoom.us/j/96832323232>

Joscelyn Mejias, Ph.D.

Assistant Professor

Wallace H. Coulter Department of
Biomedical Engineering
Georgia Institute of Technology

*"Microphysiologic Devices for the Study of
Fibrotic Diseases in Women's Health and
Aging"*

Qin Maggie Qi, Ph.D.

James R. Mares '24 Career Development
Chair Assistant Professor

Department of Chemical Engineering
Massachusetts Institute of Technology

*" Building Advanced In Vitro Models to
Study Neuroinflammation in Retinal
Diseases "*

Susan E. Leggett, Ph.D.

Assistant Professor

Bioengineering

University of Illinois Urbana-Champaign

*"Engineering Microphysiological Systems to
Study Tumor Heterogeneity and Metastatic
Spread in Breast and Ovarian Cancer"*
